I mention these heatenees of cherical character under the Contoderacy, not with any view of bringing the profession into disrepute. War, at the best, is a demoralize. It develops all that is bed in a man. The disposition to do wrong, which the influences of good society and the fear of law restrain in times of peace, invariably finds all restrains removed in the will life of cump and campaign. The clergy is not axempt from the discoveries thus made. The high character of their calling makes offenses and crimes in them more prominent, more odium, precisely as the cowardies of a general officer in the miner promoted. The rebotion has brought to light many elegymen that wy dently belonged assens the wolves, not the sheep. If is an interesting quotion, when the cherty and head of the content of the content of the advocacy of that they wrong, skreer, or are released in the subject of the most meet that our armies find, are the clergy and the ladies. It is a singular heat, that here in Hintsville, where the subject and best of the legicand medical profession arow themselves loyal, and are doing all in their power to secare the restoration of the old. Government, there is not a resident elegy more who has taken the oath of sliegiance—will take it willingly—makes any professions of logalty, or will in public service observs the time-honored custom of praying for the President of the United States. It being dull in Washington, and nothing interesting transpiring in frost, your correspondent took a run down to this Point to see the gallant boys of the 8th Illinois cavalry, who are in camp here.

This place is some four miles down the river from the city, on the eastern bank of the Potomse, and is the great depot for early horses, which are sent here from the values distributed of the anny, to be rejuvenable. HER MAJESTY" CHA COMMERCIAL.
